## SUMMARY

Computer Science graduate passionate about **software engineering, AI/ML, and data-driven systems**. Experienced in building **scalable applications, intelligent pipelines, and interactive tools**. Strong problem-solver with proven ability to deliver **end-to-end solutions** in both individual and team settings.

## EDUCATION

### Denison University

B.A, Computer Science

Aug 2021 - May 2025

Relevant Coursework: [Algorithms & Data Structures, Artificial Intelligence, Computer & Data Systems, Mathematical Foundation of CS, Technical Communication, Game Design]

## PROJECTS

### Nooksi | [HTML, CSS, JavaScript, Python, Firebase, Fullstack, Scraping]

[Website](#)

- Founded and launched a student **expense tracking platform** with leaderboard + projections.
- Increased user engagement **40%** through **iterative feedback-driven feature design**.

### Manhwa-AI Translator | [Python, PyTorch, OpenCV, Google Cloud Vision, Gemini API, CustomTkinter]

[GitHub Link](#)

- Built **end-to-end CV pipeline** automating translation workflow, reducing manual work by **80%**.
- Trained **custom Faster R-CNN** model (92% accuracy) on 160+ annotated images.

### Music Classifier & Recommender | [Python, AI/ML, TensorFlow, Pandas, Reinforced Learning]

[GitHub Link](#)

- Developed neural network (**90% accuracy**) across 10 genres using MFCC + spectral features.
- Optimized training pipeline, improving model accuracy **+15%** and reducing inference time **20%**.

### Forsaken (Unity Game Project) | [C#, Unity Game Engine]

[Web Build](#)

- Designed **modular C# systems** for combat, player abilities, and boss AI.
- Enhanced gameplay through **iterative playtesting & balance adjustments**.

### Genshin Impact Assistant | [Python, SQL, API Integration, Google Gemini API]

[GitHub Link](#)

- Migrated **50k+ records** into SQL database; built Gemini-powered query assistant (95% accuracy)..
- Automated data pipelines + error handling to ensure **secure, reliable queries**.

### Reinforced Learning: Chutes & Ladders | [Python, AI/ML, Reinforced Learning]

[GitHub Link](#)

- Applied Dynamic Programming, Q-Learning, and SARSA to train an agent for **optimized decision-making**.
- **Designed test simulations** of thousands of games to **evaluate policies and refine** reward functions.
- Documented results with **clear validation metrics** and visualizations for reproducibility and error analysis.

## WORK EXPERIENCE

### Denison University

Front Of House Student Manager

Jan 2024 - May 2025

Granville, OH

- **Supervised and trained** a 15-person team, improving workflow efficiency **25%**
- **Resolved issues under time constraints**, applying **systematic problem-solving** to ensure service quality.

### Denison University

RedTech Event Lead

Aug 2024 - May 2025

Granville, OH

- **Coordinated live event setups**, troubleshooting **sound/lighting issues** under pressure.
- **Mentored junior techs**, fostering **collaboration** and technical growth.

## SKILLS & INTERESTS

**Languages & Tools:** Python, C++, C#, Java, SQL, JavaScript, HTML/CSS, Git, Docker

**Frameworks & Platforms:** PyTorch, TensorFlow, OpenCV, Firebase, Google Cloud APIs, AWS, React, Unity, Next.js
