

Andrew Angulo

(347) 942-7494 | Queens, NY | ajangulo8@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

OBJECTIVE

CS graduate with hands-on experience shipping products and working with users, seeking an APM/PM/Solutions Engineer role. Focused on clear communication, problem solving, and translating technical concepts into real outcomes for customers.

EDUCATION

Denison University

Aug 2021 – May 2025

B.A., Computer Science

Relevant Coursework: Algorithms & Data Structures, Artificial Intelligence, Computer & Data Systems, Technical Communication, Game Design

PROJECTS

Nooks | *HTML, CSS, JavaScript, Python, Firebase*

[Live Site](#)

- Identified a gap in personal finance tooling for students; **defined product scope**, shipped a cloud-based expense tracker with real-time multi-device sync, and **iterated based on direct user feedback**.
- Drove 40% engagement increase** by **prioritizing and shipping feedback-driven features**, using **user behavior analysis** to inform each product iteration.
- Reduced user-reported errors** through **data validation improvements** and edge case handling, lowering manual correction rates significantly.

Dropima | *Next.js, Supabase, Playwright, ZenRows, Stripe*

[Live Site](#)

- Built a SaaS movie ticket monitoring app that **automates seat scraping** across Fandango and AMC to detect IMAX 70mm film drops, **replacing a fully manual workflow**.
- Shipped Stripe payment integration with two pricing tiers (\$4.99 per-event, \$9.99/month); **built premium theater sorting** and 70MM IMAX detection **using field-level amenity data**.

Manhwa-AI Translator | *Python, PyTorch, OpenCV, Google Cloud Vision, Gemini API*

[GitHub](#)

- Identified a high-friction user workflow** and shipped an end-to-end computer vision pipeline, **cutting manual effort ~80%**.
- Trained a custom ML model on **160+ annotated images** achieving **92% detection accuracy**; shipped OCR post-processing to preserve layout readability for end users.

Music Classifier & Recommender | *Python, TensorFlow, Pandas, Reinforcement Learning*

[GitHub](#)

- Shipped a neural network classifier reaching **90% accuracy across 10 genres**; iterated on model training to **improve accuracy 15%** and **reduce inference time 20%**.

WORK EXPERIENCE

Front of House Student Manager

Jan 2024 – May 2025

Denison University | Granville, OH

- Led and developed a 15-person team**; **restructured roles and workflows** to improve operational efficiency **25%**, reducing service bottlenecks during peak hours.
- Owned real-time decision making** under strict time constraints, maintaining **service quality and team coordination** across high-volume shifts.

RedTech Event Lead

Aug 2024 – May 2025

Denison University | Granville, OH

- Managed end-to-end live event production**; diagnosed and resolved sound/lighting failures in real time under **high-visibility, time-constrained conditions**.
- Standardized operating procedures** and mentored junior techs, reducing setup errors and improving **team reliability** across events.

Student Ambassador

Sep 2023 – Mar 2024

Denison University | Granville, OH

- Conducted high-volume outreach**; **iterated on messaging strategy** based on outcome tracking and consistently met fundraising targets.

SKILLS

Languages & Tools: Python, Java, SQL, JavaScript, HTML/CSS, Git

Frameworks & Platforms: PyTorch, TensorFlow, Firebase, Google Cloud APIs, React, Next.js

Product & PM Skills: User research, product roadmapping, agile methodology, requirements gathering, cross-functional collaboration, data-driven decision making, stakeholder communication, KPI tracking
