SUMMARY

Recent Computer Science graduate driven by a passion for software development, machine learning, and data engineering. Eager to leverage hands-on experience building scalable applications and intelligent systems through real-world projects to contribute creatively to an innovative engineering team, particularly in Game Design and AI/ML applications.

EDUCATION

Denison University

B.A, Computer Science

Aug 2021 - May 2025

Relevant Coursework: [Algorithms & Data Structures, Artificial Intelligence, Computer & Data Systems, Mathematical Foundation of CS, Technical Communication, Game Design, Functional Programming]

PROJECTS

Forsaken (Unity Game Project) | [C#, Unity Game Engine]

[Web Build](#)

- Engineered **modular C# scripts** for reusability across 5+ bosses and various player abilities, optimizing development.
- Led implementation of core gameplay mechanics significantly **enhancing player experience**.
- Collaborated with a 4-person team to balance difficulty and create an immersive gameplay loop, receiving positive peer feedback.

Music Classifier & Recommender | [Python, AI/ML, TensorFlow, Pandas, Reinforced Learning]

[GitHub Link](#)

- Developed a neural network for real-time classification of 10 music genres using MFCC & spectral features, achieving **90% accuracy**.
- Streamlined a preprocessing pipeline to extract 10 key audio features, **enhancing model accuracy by 15%**.
- Implemented model optimization techniques, **reducing inference time by 20%** while maintaining high accuracy.

Reinforced Learning: Chutes & Ladders | [Python, AI/ML, Reinforced Learning]

[GitHub Link](#)

- Executed Dynamic Programming, Q-Learning, and SARSA to **train an agent for optimal decision-making**.
- Formulated a reinforcement learning framework with custom policy visualization and stochastic state transitions.
- Simulated thousands of gameplay scenarios** to evaluate policy performance, **refining reward structures** for improved convergence.

Genshin Impact Assistant | [Python, SQL, API Integration, Google Gemini API]

[GitHub Link](#)

- Integrated EnkaNetwork API to fetch and store data for **10,000+ users** in a SQL database.
- Transformed **50,000+ records** using pandas, ensuring seamless migration to SQL.
- Built an **AI-powered assistant** leveraging Google's Gemini API for SQL-driven responses to **10,000+ queries**.

Apple Vision Pro Engagement | [Python, SQL, AI/ML]

[GitHub Link](#)

- Created an analysis of over **10,000 tweets** on Apple Vision Pro, using K-Means clustering to identify **5 key engagement patterns**.
- Optimized target consumer engagement strategies** by deriving market insights, **increasing campaign reach by 25%**.

WORK EXPERIENCE

Denison University

Front Of House Student Manager

Jan 2024 - May 2025

Granville, OH

- Managed logistics and front-of-house operations for **500+ guests**, ensuring smooth events.
- Trained and supervised a team of **15 staff members** to deliver top-tier customer service.
- Resolved **guests inquiries and issues promptly**, optimizing workflow efficiency.

SKILLS & INTERESTS

Technical Skills: Python, Java, SQL, C++, C#, JavaScript, HTML, CSS, Machine Learning, Unity, TensorFlow, Data Analysis, Software Development, Web Development, Problem Solving, Team Collaboration.

Interests: Theatre, Badminton, Game Design, Music, Movies, Volunteering, Fitness, Cooking, Photography, Augmented Reality.
